

DANIEL BUSCOMBE

Assistant Research Professor

Northern Arizona University

School of Earth Sciences & Environmental
Sustainability
625 Knowles Drive
Flagstaff AZ 86011-4099
Daniel.Buscombe@nau.edu
www.danielbuscombe.com

- I am Assistant Research Professor at NAU, teaching and researching in sedimentology, sediment transport, geomorphology, hydroacoustics, and scalable geocomputation. I often use machine learning tools in my research.
- Previously, I worked at the Grand Canyon Monitoring and Research Center, an interdisciplinary program within the U.S. Geological Survey carrying out basic and applied research into sediment issues related to the management of regulated rivers in the Western United States.
- Previously I was an a post-doctoral fellow, working in the Marine Science departments at the University of Plymouth, and before that at the University of California Santa Cruz. During those fellowships, I worked on sediment transport and hydrodynamics in nearshore and coastal shelf environments.
- My PhD research at the University of Plymouth (2004 - 2008) focused on the morphodynamics and sediment dynamics of macrotidal gravel beaches.
- I am interested in encouraging reproducible and open research practices in geosciences. To this end I spend significant time developing a variety of open-source scientific computing tools.

EDUCATION

- PhD** School of Geography, University of Plymouth, Plymouth, UK
2004-2008 advised by Prof. Gerd Masselink and Dr Mark Davidson (School of Marine Science and Engineering)
Thesis: [Morphodynamics, Sediment Dynamics and Sedimentation of a Gravel Beach](#)
- BSc** Bowland College, Lancaster University, Lancaster, UK
2000-2003 Major: Physical Geography; Minors: Environmental Science & Biological Science
First class, with honours.

EXPERIENCE

Employment

- NAU** Assistant Research Professor.
Nov. 2016–Present School of Earth Sciences & Environmental Sustainability, Northern Arizona University.
- U.S. Geological Survey** Research Geologist.
2012– Nov. 2016 Grand Canyon Monitoring & Research Center, U.S. Geological Survey.
Supervised by Dr Paul Grams.
- UoP Marine Science** NERC post-doctoral fellowship.
2009–2012 Department of Marine Science & Engineering, University of Plymouth, UK.
Supervised by Dr Daniel Conley & Dr Alex Nimmo-Smith.
- UCSC Marine Science** Postdoctoral Researcher, U.S. Geological Survey
2008–2009 & Department of Earth & Planetary Sciences, University of California Santa Cruz.
Supervised by Dr David Rubin & Dr Jessica Lacy.
- UoP Marine Ecology** Computer Programming Contractor.
2008–2011 Marine Biology & Ecology Research Centre, University of Plymouth, UK.
Supervised by Dr Kerry Howell.
- UoP BARDEX** Research Assistant, School of Geography, University of Plymouth, UK.
2008 BARDEX (Barrier Dynamics Experiment), an EU Hydralab III-funded laboratory wave flume project. Supervised by Prof. Jon Williams & Prof. Gerhard Masselink.
- UoP WHISSP** Research Assistant, School of Marine Science & Engineering, University of Plymouth, UK.
2007–2008 WHISSP (Wave Hub Impacts on Seabed and Shoreline Processes), an EU-funded field-based project studying the effects of marine renewable energy devices on the shoreline. Supervised by Prof. Jon Williams & Prof. Gerhard Masselink.
- UoP Geography** Associate Lecturer and Demonstrator (part-time).
2004–2008 School of Geography, University of Plymouth, UK.
- FSC** Assistant tutor.
2003–2004 Field Studies Council, Castle Head, Grange-over-Sands, UK.

Teaching

- EES 680** Earth & Environmental Data Analysis
Spring 2017 *Course leader – University of Northern Arizona*
- EES 698-1** Topics in Fluvial Geomorphology
Fall 2015, 2017 *Guest lecturer – University of Northern Arizona*
- EES 529** Applied Remote Sensing
Fall 2014–2016 *Guest lecturer – University of Northern Arizona*
- OS204** Waves, Tides and Coastal Dynamics
2010 – 2012 *Guest lecturer – University of Plymouth*
- OS311** Modelling Ocean Processes
2010 – 2012 *Guest lecturer – University of Plymouth*
- Geography** Introductory statistics, Glacial Geomorphology, Coastal Geomorphology
2004–2008 *Teaching assistant – University of Plymouth*
- FSC** Field- and classroom-based ecology, geology, environmental sciences
2003–2004 *Teaching assistant – Field Studies Council Castle Head*

Service

- Journal Reviewer** Arctic; Continental Shelf Research; Earth Surface Processes & Landforms; Geo-Marine Letters; Geophysical Research Letters; Journal of Hydraulic Engineering; Journal of Marine Science & Engineering; Journal of Mountain Science; Journal of Sedimentary Research; Marine Geology; Remote Sensing; Sedimentology; Sedimentary Geology; Water Resources Research.
2007–
- NEON Aquatic Technical Working Group** Member of the NSF-funded National Ecological Observatory Network Aquatic Technical Working Group, advising on bathymetry, substrate characterisation, and hydroacoustic instrumentation and analyses.
2017–
- Software Carpentry** Lead organizer for this 3 day-long, 30-person workshop at U.S. Geological Survey.
2016
- MBES in Rivers** Lead organizer for 2nd Multibeam in Rivers Workshop, a 3 day-long, 30-person workshop at U.S. Geological Survey.
2015
- AGU** Co-convener of the session, EP010. Fluvial sediment budgets: Can we do better? American Geophysical Union Fall Meeting, December 2013
2013
- AGU** Co-convener of the session, H60: Linking sediment supply, bed-sediment particle size, sediment transport, and bed morphology in fluvial, marine, and aeolian settings. American Geophysical Union Fall Meeting, December 2007
2007
- YCSEC** On the organising committee for the Young Coastal Scientist and Engineers Conference, 2007 (YCSEC 2007) hosted by the School of Geography at the University of Plymouth 19-21 April 2007.
2007
- QRA** On the organising committee for the Quaternary Research Association's 4th International Post-graduate Symposium, hosted by the School of Geography at the University of Plymouth 31st August - 2nd September 2005.
2005

Mentoring

- Andrew Platt** *Estimates of total in-channel sand storage in Grand Canyon.* MS, Northern Arizona University School of Earth Sciences & Environmental Sustainability.
2016-Present
Co-supervised with Dr Ryan Porter.
- Ryan Lima** *Remote sensing of sandbar dynamics.* PhD, Northern Arizona University School of Earth Sciences & Environmental Sustainability.
2016-Present
Co-supervised with Dr Temuulen Sankey.
- Thomas Ashley** *Sediment transport and the evolution of dune topography at the grain scale.* PhD, School of Geology and Geophysics, University of Wyoming.
2014-Present
Co-supervised with Dr Brandon McElroy.
- Rebecca Rossi** *Structure-from-Motion surveying of sandbars in Grand Canyon.* MS, Utah State University Department of Watershed Sciences.
2014-2017
Co-supervised with Dr Joseph Wheaton.

- Daniel Hamill** *Transforming a Low-Cost Leisure Gadget into a High Resolution Riverbed Remote Sensing Tool.*
2015–2017 MS, Utah State University Department of Watershed Sciences.
Co-supervised with Dr Joseph Wheaton.
- Martin Meoli** *Gravel transport under waves.* MSc Applied Marine Science, School of Marine Science & Engineering, University of Plymouth
2011–2012 Co-supervised with Dr Alex Nimmo-Smith.
- James Sawyer** *Holographic imaging of near-bed sand suspensions.* MSc Applied Marine Science, School of Marine Science & Engineering, University of Plymouth
2011–2012 Co-supervised with Dr Daniel Conley.

AWARDS & HONORS

- ASCE-EWRI Best Technical Note Award 2017** For Buscombe et al. (2016) *Automated riverbed sediment classification using low-cost sidescan sonar*, Journal of Hydraulic Engineering. Awarded by the Environmental & Water Resources Institute, American Society of Civil Engineers.
February 2017
- USGS "What's the Big Idea?"** Research featured in the video [What's the Big Idea? —Using Sound to Remotely Sense the Riverbed](#) on the YouTube channel of the U.S. Geological Survey
March 2016
- American Geophysical Union Research Spotlight** Research featured in the article [Using Sound Waves to Study Grand Canyon Sediment](#) in EOS Earth and Space Science News
July 2015
- Elsevier "Excellence in Peer Review" Award** for the Elsevier journal, *Sedimentary Geology*
2013
- JGR-Oceans Editor's Highlight** Research featured in the article [Novel observations of currents and drag generated by a tsunami](#) published in the Journal of Geophysical Research - Oceans.
September 2012

COMPUTING

I am an active developer and maintainer of several scientific computing packages. See my github profile (<http://github.com/dbuscombe-usgs>) for details.

Skills

- Experienced open source developer, with a specialization in scientific computing, including visualization, geospatial statistics, signal processing, image processing and machine learning.
- Expert in the Python Language and extensions such as Cython; expert in the MATLAB language, experience writing R, C, C++, and Fortran code.
- Experience with a variety of tools and languages, including bash, csh, L^AT_EX, HTML, Git, Linux, virtual machines, virtual environments, auto-deployment of software packages (PyPI, SWIG, Distutils, conda), distributed, parallel, out-of-core and cloud computing.
- Experience with Hydrodynamic modelling software, including the [General Ocean Turbulence Model](#); Simulating Waves Nearshore ([SWAN](#)); Simulating Waves 'til Shore ([SWASH](#)).
- Experience with Hydrographic surveying and mapping software, including [Generic Mapping Tools](#), [MB-System](#) and [HYPACK](#), GIS, and geospatial libraries such as GDAL, Mapbox and Proj-4.

Major Software Projects

- DGS** Software for automated analyses of grain size from images of sediment. Source code currently available in Matlab and Python.
2010–Present
- PyHum** Software for reading, processing and analysis of Humminbird sidescan data. Source code available in Python/Cython.
2014–Present
- pyses** Python program for spatially explicit spectral analysis. Software for spatially explicit analysis of point clouds and spatially distributed data. Source code available in Python.
2015–Present

Sand Simulation Toolbox 2011–2012	Software for generating 3D discrete particle models consisting of realistic particles (with a size- and shape-distribution) with user-defined properties. Source code available in Matlab.
MATSCAT 20012	Software for analysis of multiple-frequency acoustic backscatter for suspended sediment concentration and particle size. Source code available in Matlab.
Benthic Analysis Tool 2008–2011	Software for the semi-automation of species identification and measurement in deep-sea ROV/drop frame images. Source code available in Matlab.

SELECTED TALKS

**= invited talk

- September 2017 *The sand dunes of the Colorado River, Grand Canyon, USA.*
River, Coastal and Estuarine Morphodynamics Conference, Italy.
- **August 2017 *Automated substrate characterization using low-cost sidescan sonar: challenges and opportunities.*
Annual American Fisheries Society Meeting, Tampa, FL.
- **March 2017 *Particle Size ‘by Proxy’: Decoding the Textural Information in Scattered Sound & Light*
Utah Water Research Laboratory, Utah State University, Logan, UT.
- **December 2016 *Large-scale SfM: Grand Canyon Style*
Pacific Coastal & Marine Science Center, USGS, Santa Cruz, CA.
- **October 2016 *Particle Size ‘by Proxy’: Decoding the Textural Information in Remotely Sensed Landforms*
School of Earth Sciences & Environmental Sustainability, Northern Arizona University, Flagstaff, AZ.
- July 2016 *Stochasticity of riverbed backscattering, with implications for acoustical classification of non-cohesive sediment using multibeam sonar*
8th International Conference on Fluvial Hydraulics, St. Louis, MO
- **January 2016 *The Digital Grain Size Web Computing Application*
USGS Center for Data Integration, Denver, CO
- **January 2016 *Observations of sand dune migration on the Colorado River in Grand Canyon*
Glen Canyon Dam Adaptive Management Program Adaptive Management Work Group Meeting, Phoenix, AZ
- April 2015 *Considerations for unsupervised riverbed sediment characterization using low-cost sidescan sonar: Examples from the Colorado River, AZ and the Penobscot River, ME.*
Proceedings of the 10th Federal Interagency Sedimentation Conference, Reno, NV
- April 2015 *Using oblique digital photography for alluvial sandbar monitoring and low-cost change detection.*
Proceedings of the 10th Federal Interagency Sedimentation Conference, Reno, NV
- April 2015 *Hydroacoustic signatures of Colorado riverbed sediments in Marble and Grand Canyons using multibeam sonar*
Proceedings of the 10th Federal Interagency Sedimentation Conference, Reno, NV
- March 2015 *Acoustic and topographic sediment classification in Lower Marble Canyon*
2nd MBES in Rivers Workshop, USGS Flagstaff, AZ
- March 2015 *Characterizing sand dune migration on the Colorado River in Western Grand Canyon using repeat multibeam mapping*
2nd MBES in Rivers Workshop, USGS Flagstaff, AZ
- March 2015 *Towards automated substrate mapping with low-cost sidescan sonar*
2nd MBES in Rivers Workshop, USGS Flagstaff, AZ
- **February 2015 *The Digital Grain Size Project: Past, Present and Future*
USGS Coastal and Marine Geology, Woods Hole, MA
- December 2014 *Topographic and acoustic estimates of grain-scale roughness from high-resolution multibeam echo-sounder: examples from the Colorado River in Marble and Grand Canyons*
American Geophysical Union Fall Meeting, San Francisco, CA
- **August 2014 *Measuring bed sediments for improved sediment budgets and physical habitat assessment*
Glen Canyon Dam Adaptive Management Program Adaptive Management Work Group Meeting, Flagstaff, AZ

- **February 2014 *Bed Sediment Classification Using High-Frequency Acoustic Backscatter*
Multibeam in Rivers Summit, Utah State University, Logan, UT
- December 2013 *Acoustic Scattering by an Heterogeneous River Bed: Relationship to Bathymetry and Implications for Sediment Classification using Multibeam Echosounder Data*
American Geophysical Union Fall Meeting, San Francisco, CA
- July 2012 *Schmidt number of sand suspensions under oscillating-grid turbulence*
33rd International Conference on Coastal Engineering, Santander, Spain
- **July 2012 *Digital Grain Size*
British Geological Survey, Marine Geosciences Division, Edinburgh, UK
- **February 2012 *Nearshore Sediment Transport Through the Looking Glass*
Grand Canyon Monitoring and Research Center, Flagstaff, AZ
- February 2012 *Co-variation of intertidal morphology, bedforms and grain size on a macrotidal sand beach: Praia Sands, UK*
Ocean Sciences 2012, Salt Lake City, UT
- December 2011 *How do you tell how big something is without direct measurement? Estimating grain size using an image's spectrum*
American Geophysical Union Fall Meeting, San Francisco, CA
- November 2010 *Hourly Measurements of Grain-Size from the Inner Continental Shelf Seabed Using a Fully-Automated, Hydraulically-Controlled Underwater Video Microscope*
Particles in Europe 2010, Villefranche-Sur-Mer, France
- June 2010 *An automated and 'universal' method for measuring mean grain size from a digital image of sediment*
9th Federal Interagency Sedimentation Conference, Las Vegas, NV
- February 2010 *Modeling sand resuspension and stratification in turbulent nearshore flows: sensitivity to grain size distribution*
Ocean Sciences 2010, Portland, OR
- **February 2010 *Turbulence, Sediment Stratification and Altered Resuspension under Waves*
Centre for Coastal Science and Engineering, University of Plymouth, UK
- **January 2009 *Morphodynamics and sediment dynamics of a macrotidal gravel beach*
Coastal and Marine Geology, United States Geological Survey, Santa Cruz, CA
- **October 2008 *Optical sensing of gravel sediment transport and characteristics: recent advances and future challenges.*
Lancaster University Environmental Imaging Network, Lancaster University, UK
- September 2008 *Granular Properties from Digital Images of Sediment: Implications for Coastal Sediment Transport Modelling*
31st International Conference on Coastal Engineering (ICCE), Hamburg, Germany
- December 2007 *The relationship between sediment properties and sedimentation patterns on a macrotidal gravel beach over a semi lunar tidal cycle*
American Geophysical Union Fall Meeting, San Francisco, CA
- **November 2007 *A year in the life of Slapton Sands - but was it a typical year?*
Slapton Research Seminar, Field Studies Council, Slapton Ley, UK
- May 2007 *Field observations of step dynamics on a macrotidal gravel beach*
Coastal Sediments 2007, New Orleans, LA
- **December 2006 *Field observations of morphological change and sediment dynamics from the nearshore of a gravel beach*
Centre for Coastal Dynamics and Engineering (C-CoDE), University of Plymouth
- **November 2006 *A view from the beach*
Slapton Research Seminar, Field Studies Council, Slapton Ley, UK
- **December 2004 *A tale of two storms*
Slapton Research Seminar, Field Studies Council, Slapton Ley, UK

GRANTS

USGS Coastal and Marine Geology Program \$350,000	Co-Investigator (multiple PIs, J. Warrick and others), (2017 - 2018) Remote Sensing Coastal Change.
U.S. National Park Service \$450,000	Co-Investigator (multiple PIs, P.E. Grams and others), (2017 - 2020) Geomorphology and Sediment Transport on the Green and Colorado Rivers in Canyonlands National Park.
USGS Mendenhall post-doctoral fellowship \$200,000	Co-investigator: T. Sankey (PI), P. Grams, A. East, D. Buscombe., T. Sankey, (2015 – 2017). The fluvial-aeolian- hillslope continuum: measurement and modeling of topography and vegetation to inform landscape-scale connectivity for sediment in river valley ecosystems
USGS Center for Data Integration \$46,417	Principal-Investigator (2015 - 2016). The digital grain size web and mobile computing application
USGS Innovation Fund \$48,994	Principal-Investigator (2015 - 2016). LOBOS (Limnological and Oceanographic Benthic Observation System): The next generation dual-scale submersible benthic imaging system. Jointly funded by the USGS Innovation Fund (\$16,497), the Innovation Center for Earth Science Director's Fund (\$17,497) and the USGS Southwest Biological Science Center (\$15,000)
Glen Canyon Dam Adaptive Management Work Group \$4,253,400	Co-Investigator (multiple PIs – J. Schmidt and others), (2015 - 2017). Sandbars and sediment storage dynamics: long-term monitoring and research at the site, research and ecosystem scales. Grand Canyon Monitoring and Research Center Triennial Work Plan
National Park Service \$232,016	Co-Investigator (multiple PIs – P.E. Grams and others), (2014 - 2017). Geomorphic Processes and Relations Among Flow Regime, Sediment Flux and Resource Conditions on the Green River in Canyonlands National Park
Glen Canyon Dam Adaptive Management Work Group \$2,911,400	Co-Investigator (multiple PIs – J. Schmidt and others), (2013 - 2014). Sandbars and sediment storage dynamics: long-term monitoring and research at the site, research and ecosystem scales. Grand Canyon Monitoring and Research Center Biennial Work Plan
Engineering and Physical Sciences Research Council, UK £240,000	Co-Investigator; G. Masselink (PI), D.C. Conley, D. Buscombe., (2012 - 2014). Proto-type Experiment and Numerical Modelling of Energetic Sediment Transport under Waves (PESTS). EPSRC EP/K000306/1.
Plymouth Marine Science Education Fund £250	Principal-Investigator (2008). Travel grant to attend and present at ICCE Hamburg 2008
Challenger Society for Marine Science £150	Principal-Investigator (2008). Travel grant to attend and present at ICCE Hamburg 2008
Society for Sedimentary Geology Grant \$500	Principal-Investigator (2008). President's Fund to investigate nearshore bedload transport and bedforms with stereo underwater video cameras
International Association for Mathematical Geology \$2000	Principal-Investigator (2008). Grant to develop and trial algorithms for quantification of granular properties and coarse-grain sediment transport from images of the sea bed
International Association of Sedimentologists 700 euros	Principal-Investigator (2008). Grant to investigate nearshore bedload transport and bedforms with stereo underwater video cameras
American Geophysical Union \$600	Principal-Investigator (2007). Travel Grant, to attend the AGU 2007 Fall Meeting in San Francisco, CA
British Geomorphological Society £300	Principal-Investigator (2007). Postgraduate award, to attend and present at Coastal Sediments 2007, in New Orleans, LA
